Enhanced Comfort and Efficiency for Unique Heating and Cooling Needs

Innovation Since 1902

Carrier has been the world's leading indoor comfort innovator since 1902. Today, as the world's largest manufacturer of HVAC systems and equipment, we ship a new product every three seconds. But we deliver more than just the hardware. We provide innovative total comfort solutions backed by world-class factory support. So when your comfort challenges demand Duct-Free systems, one name should come to mind: Carrier.

Things to Consider Before You Buy

The Comfort of High-Efficiency

Your home is your refuge. It's the one place you are in total control of your comfort. However, not all living spaces are a compatible fit with traditional forced-air heating and cooling systems. That's why Carrier offers a comprehensive family of duct-free high wall comfort systems. Designed to provide comfort where typical forced air systems can't, and offering a more elegant solution than a window unit, a Carrier® Performance™ Series Xpower® Duct-Free High Wall Split system could be the perfect solution for outstanding comfort and even better economy.

- Xpower systems deliver high-efficiency, 16.0 SEER cooling for lower operating costs
- Enjoy additional economy by using this system only when you are using the space without conditioning the entire home
- The longer run times of the inverter compressor technology provides improved humidity control and enhanced comfort
- Leave the system off while you're away and let it turn on automatically for comfort when you return with its built-in timer function
- Our sleep mode automatically adjusts temperature and fan speed at night for additional money savings

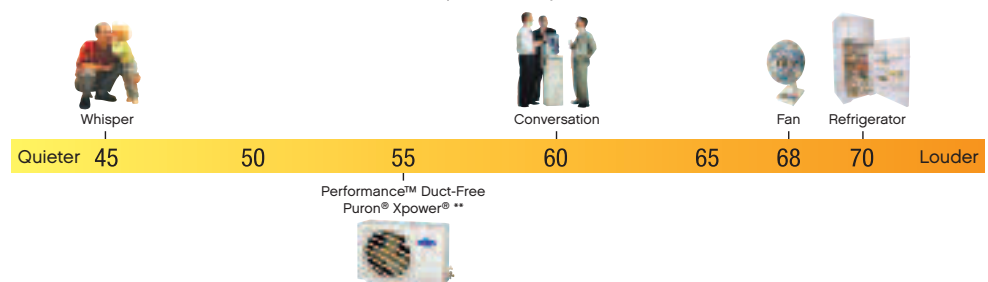

The Comfort of Xpower

Whether you're entertaining in a new game room, relaxing in a sun room or enjoying a vigorous workout in an exercise room, Carrier delivers the enhanced comfort you deserve with an Xpower Duct-Free High Wall system. Xpower technology varies compressor speed to match the load and keeps the system operating continuously rather than cycling, which can create temperature swings. You won't believe the comfort as conditioned air is quietly and gently directed to every corner of the room!

- Living space remains consistently comfortable without the up and down temperature swings of fixed speed traditional systems
- Rapid pull down feature enables the system to quickly achieve desired setpoint
- Enjoy quiet comfort with sound levels that fall comfortably between a whisper and an average conversation

Comparative Sound Ratings (decibels)

** Per standard testing as described by ARI 270-95. Other sound levels, mentioned for comparison, as published at <http://www.nidcd.nih.gov/health/hearing.ruler.asp>.

A Comfortable Fit

The Carrier® Duct-Free High Wall systems are designed to be a comfortable fit for virtually any living space. A slim, compact cabinet sits unobtrusively on the wall, discreetly blending into most interior designs. Designed to use environmentally sound Puron® refrigerant, it's also a fully featured system that couldn't be easier to operate and maintain.

- Take control of your comfort with the sophisticated yet intuitive, easy-to-use LED infrared remote
- Customize your comfort with motorized louvers that can sweep to spread conditioned air or be "locked in" to focus comfort on a specific area
- An LED display allows the user to quickly monitor the temperature set point, mode setting, as well as systems diagnostics.
- Will not obstruct outside view and provides peace of mind with added security when compared to traditional window units
- Maintain your comfort with an easy-to-remove filter that can be cleaned in a utility sink
- Experience peace of mind with the full backing of Carrier's nationwide network of expert dealers

Extra-efficient, exceptionally quiet, and backed by the innovative leader in indoor comfort systems, a Carrier Xpower® Duct-Free High Wall system is a great choice for your unique heating and cooling needs.

The Carrier Duct-Free High Wall systems deliver environmentally sound comfort with Puron refrigerant.

Model 40GX

Model 38GX

This matched horizontal discharge outdoor unit features a small footprint that can be installed easily in tight quarters such as a balcony.

Cooling Only – Variable Speed – Up to 16.0 SEER*

Limited Warranty

The Carrier Duct-Free High Wall systems provide dependability backed by written warranty protection. The compressor is protected by a six-year* limited warranty. The entire system is covered by a two-year* limited warranty. Extended warranties are also available. Ask your Carrier dealer for details.

*Owner-occupied, single-family residential applications only. See warranty card for more details.

Turn to the Experts

Willis Carrier invented air conditioning in 1902. Over 100 years later, we're proud to say Carrier® systems are trusted in more homes than any other brand.

Carrier continues to be on the forefront of innovative engineering and unsurpassed standards of excellence. So when choosing a home comfort system, you'll want to turn to the experts. Your Carrier dealer will evaluate your home, such as window placement and size, ductwork, other structural specifics and lifestyle to provide a customized indoor comfort plan designed specifically for you. And when you have an expert helping you make an educated decision, you're going to feel more comfortable.
