Rotobrush®

Air Duct Cleaning System

In today's air-tight homes, indoor air quality is a growing concern. Most household dust contains dust mites, mold, mildew, pollen, and animal dander. Many of these contaminants are circulated through the central air systems in most homes and can aggravate the symptoms of asthma and allergies.

How can these contaminants be removed from the air duct systems? Our team of knowledgeable professionals at A Plus Air have combined their proven techniques with the Rotobrush® Air Duct Cleaning System.

This advanced cleaning method is the only one available that brushes and vacuums at the point of contact, eliminating the use of harsh chemicals such as sealers. You are left with the assurance of fresh, clean and virtually contaminant-free air in your home and office.

Here's How It Works: As Simple As 1, 2, 3!

1

We clean the register covers to remove cooking oil film, nicotine film and other dust-collecting substances.

We deep clean the source of the air supply including (where applicable) the blower, squirrel cage, coils, condensation pan, and return air supply.

2

3

The air ducts are then brush vacuumed clean with our exclusive, patented Rotobrush® which removes the contaminants that circulate through the air duct system. We will sanitize your air ducts and vents with an environmentally safe product commonly used in hospitals and nursing homes, leaving behind a fresh scent.

Rotobrush® Air Duct Cleaning System

The powerful yet flexible Rotobrush® easily cleans all types of air duct construction (e.g. flex duct, round metal ducts, square metal ducts, fiberboard) including right angle turns, reducers and multiple bends found in most types of duct systems.

RotoVent-Vac® Dryer Vent Cleaning System

The RotoVent-Vac dryer vent cleaning system is a powerful, portable machine with 300CFM. Helpful tools allow us to thoroughly clean the dryer vent ducts and remove any blockages or buildup.
